Dog Inspection Record

At the beginning of your 4-H project year, ask your 4-H leader/trainer to help you inspect and evaluate your dog in the areas listed below. Comments made should include what improvements need to happen, if any. Do a second evaluation prior to your county fair and make comments on what improvements have been made in each area.

Condition of coat—clean, matted, brittle		
Condition of skin—healthy, dry, irritated		
Condition of eyes—clear, runny, matter		
Condition of ears—clean, dirty, infected		
Body weight—ideal, fat, thin		
Conditions of gums—pale, inflamed, healthy		
Condition of teeth ---clean, tartar, stained		
Condition of nails—short, long		
Temperament—friendly, shy, aggressive		

Body Condition Score

A helpful tool to use when assessing the overall health of an animal is body condition scoring. Body condition scoring is used to assign a value, 1-5 based on defined criteria. Evaluation of an animal's body condition involves both visual examination and palpation of the bone structure, especially the ribs, vertebrae and pelvis. Specific criteria for scoring the body condition of the dog is described below.

Body condition scores:

1. Emaciated, poor
2. Under-conditioned, thin
3. Well-conditioned, optimal
4. Over-conditioned, fat
5. Obese, grossly fat

Description of each score:

1. The ribs, vertebrae and pelvic bones are prominent. The abdomen is extremely concave. Muscle loss is apparent.
2. The ribs, lumbar vertebrae and pelvic bones are easily seen. The abdomen is concave.
3. The ribs, lumbar vertebrae and pelvic bones are easily palpable with a slight fat cover. There is an apparent indentation at the abdomen, visible from above and from the side.
4. The ribs and lumbar vertebrae are difficult to palpate. Pelvic bones can be palpated with moderate fat/tissue cover. The abdomen is not indented.
5. The ribs and lumbar vertebrae are extremely difficult or impossible to palpate. The pelvic bones are difficult to palpate. The abdomen is bulging.
